Town Halls create opportunity for member participation

VOLUNTEERING in our communities

Help the Council save member money by filling out the attached postcard and mailing it in.
CARPENTERS WALLEYE FISHING TOURNAMENT
June 15 • Hunter’s Point Resort • Lake Mille Lacs, MN

Forty-four boats participated in this year’s event on Lake Mille Lacs. In addition to seven hours of boating and fishing fun, participants had dinner, won sporting goods from a raffle drawing, and some won cash prizes for the top 10 largest fish caught.

Grand prize winner of the Polaris Sportsman 500 4x4 was John Emerik, who fished with Josh Blackledge, Local 322.

Mark your calendars for next year’s fishing tournament: Saturday, June 14, 2014.

Since I was elected EST two years ago, I have been involved with more meetings than I ever thought possible. And over and over again, what comes out of those meetings is that we want our union and its members to be the safest, best trained and most productive workforce there is. We want to be leaders in our industry, and we feel the way to accomplish this goal is through communicating with members and successful partnership with our contractors.

Thanks to a lot of hard work and participation from our members, our Council has had a lot of successes over the last several months. When we were in the midst of difficult contract negotiations in Minnesota, we implemented Town Hall teleforns to talk, openly and honestly, with the greatest number of members possible. We again used this method of communicating with members in June when discussing pension issues in Wisconsin. (For more information, see page 5.)

While the Town Hall teleforns are a great use of technology, those calls were successful only because members participated. You got on the phone, you listened to what your Council leadership had to say, and you asked important questions that were on the minds of hundreds of other members.

Now that we have successfully used the Town Hall teleforns to communicate with members, our next goal is to lower the cost of this new technology. Unfortunately, it costs the Council nearly twice as much when members call in to the hotline vs. when the Council can auto-dial you at home or on your cell phone. That’s why we are asking you to fill out the postcard in this magazine, giving us permission (as required by law) to auto-dial your cell phones.

**Last fall, the UBC** gave us a vote of confidence by inviting 125 of our Council’s journeymen and women to participate in a Journeyman Leadership program at the International Training Center in Las Vegas. Members enjoyed learning more about the vision and values of the UBC so much that we have continued that training here at home. In March we held a leadership conference in Saint Paul, where members heard from Council leadership on a number of programs on our regional level. They toured our training centers and had the opportunity to ask questions directly of myself and Council Directors. (For more information, see page 8.)

In November we will continue this training by hosting a Town Hall teleforn that includes those members who have participated in the Journeyman Leadership Program, as well as members who have participated in the Third Year Apprentice Program at the ITC. The Town Hall will eliminate some of the costs associated with bringing members from our six states to one location for training, while still giving the opportunity for members to hear from leadership and to ask questions and share ideas.

**Back in January,** we started holding monthly foreman meetings in Omaha. The goal of these meetings is to give members who are already leaders on jobsites the opportunity to exchange ideas, ask questions and share common frustrations on the job. Discussions often center on our goals of improving the skills, productivity and attitude of our members so we can offer the best value to our contractors. These have been so successful that we have also started holding foreman meetings in Des Moines and Madison.

**Another way** we are having and sharing our success is via our Pro 10 class. Pro 10 teaches members the core principles of professionalism, safety, communication and mutual respect. Its ultimate goal is to create and maintain respectful and productive worksites. More and more contractors and customers are beginning to require its employees to have Pro 10 training, so if you haven’t taken a class yet, go online at www.northcountrycarpenter.org/training-centers.php and see when the next class is being offered. (For more information, see page 27.)

**We have also** been working on strengthening our Apprenticeship Committees. Apprenticeship committees exist so newer members can get involved with our union, learn from and network with other members, and have an opportunity to voice their ideas. Since today’s apprentices will be the leaders of tomorrow’s union, we want to make sure you are informed, engaged and invested.

**Looking down the road,** we have already begun prepping for contract negotiations in Wisconsin, Iowa and Nebraska, as well as the Minnesota Highway Heavy and Northern Minnesota carpentry contracts. These contracts will come up in the spring, and the Town Hall teleforns will almost certainly be used to better communicate with our members during this process.

**I think** we are making great strides as a Council that listens to its members and works with you to achieve greater success for all. If you have your own ideas of how we can improve our union, I’d love to hear from you! The easiest way for you to share your thoughts is by sending an email to me at info@ncsrcc.org.

In solidarity,

[Signature]

JOHN RAINES

executive secretary-treasurer | JOHN RAINES
In the past year, the NCSRCC has conducted several Telephone Town Hall forums with its members. To date, the topics of these telephone town halls have centered on contract negotiations and pension issues.

In a telephone town hall, members are auto-dialed a day in advance of the actual teleconference. They are told about the time, date and topic of the upcoming town hall, so they can make plans if they wish to be near a telephone and participate. This information is also shared with members for whom we have email addresses.

During the town hall, members hear directly from Executive Secretary-Treasurer John Raines about the topic. Other experts on the topic sometimes also speak. The benefit to these town hall meetings is that you, as a member, can hear directly from Council leadership, as well as ask questions live and have them answered immediately by your union’s leadership team.

To participate and ask a question, you simply press a number within the call and you are put in a queue to ask your question. Town hall teleforums typically last about 60 minutes, and you need listen only as long as you are interested.

On occasion, we run out of the allotted time, but then you are able to leave your question on voicemail at the end of the teleforum, and your call is returned the next day. So far, members have been very happy with the extra information they are able to obtain during a telephone town hall, and have said they appreciate having access to ask direct questions of our leadership.

“I participated in the Town Hall forums during the negotiations this year and I thought they were a valuable tool,” said Jason Klous, Local 322. “With the consolidation of the Twin Cities locals and the time pressures on working men and women with families, it is important that we look for ways to keep the lines of communication open. In the past I have been a job steward and carpenter foreman during contract negotiations and I have experienced all sorts of jobsite rumors. The fact that John was able to speak to such a large audience of rank-and-file members all but eliminated the rumors associated with the recent contract.”

You can be assured the Council will not sell your private cell phone number for any reason. Additionally, it is important to note these telephone town halls only happen a few times a year — we promise the Council will not call you weekly or even monthly. We know you value your time at home with family and friends.

If you have additional questions, contact Tracy Madden at the Council at 651-379-0235.

Express consent needed to dial cell phones

Although the Council is able to auto-dial your home phone number, it is not allowed — by law — to dial your cell phone number unless we have express consent. In past telephone town halls, the Council allowed members to call from their cell phones if they wished to participate in the call.

Unfortunately, when members call in to the number, as compared to when the Council auto-dials out, the cost nearly doubles. Therefore, in a concerted effort to spend member money wisely, the Council hopes to get consent to auto-dial your cell phone. To give express consent, please either fill out and mail in the attached postcard located on the inside front cover of this magazine, or go online and fill out a form at www.northcountrycarpenter.org/cell-authorization.php.
INSTALL UNVEILS WARRANTY AND CERTIFIED CONTRACTOR PROGRAM

INSTALL (International Standards and Training Alliance) Floorcovering Professionals announced a new INSTALL Warranty & Certified Contractor program in June. Effective immediately, INSTALL guarantees the work of its Certified Contractors. The warranty covers commercial and residential installations of carpet, resilient and hardwood flooring. Industries served include healthcare, education, hospitality, retail, residential and more.

“This warranty is the first of its kind in the floor covering industry,” according to INSTALL Director John McGrath. “It is a third-party additional guarantee provided by the INSTALL committee. Only the best capitalized, most professional contractors in North America achieve the status of being an INSTALL Certified Contractor – and therefore qualify to carry the Warranty on Labor.”

Michel Vermette of Mohawk Industries said improperly installed floor coverings are one of the biggest complaints in construction.

“The INSTALL Warranty on Labor, combined with the Certified Contractor program, will mitigate this major disruption for end users and the Architect & Design community,” Vermette said. “The best product in the world is only as good as its installation. Mohawk believes this warranty program will minimize disruptions for end users, increase performance of the project life cycle and create higher customer satisfaction.”

Leonard Zmijewski, CEO of Mr. David’s International Flooring, said he views the warranty as a promise. “I already assure customers that flooring installed by my crews will not fail. Now, customers not only have my word, but also an additional, value-added warranty to back it up.”

McGrath explained that the most important ingredient to becoming an INSTALL Certified Contractor is employing only mechanics who have current INSTALL Certifications. The INSTALL Certification was created to identify INSTALL’s most dependable and skilled installers.

“We applaud the INSTALL program and its leadership for having the diligence to develop a standardized curriculum for its thousands of installers, a certification process to test and then reward exceptional skills, and now this certified contractor and warranty program,” Vermette said.

For more information, visit the INSTALL website at www.installfloors.org. INSTALL Certified Contractors can be found online at www.installfloors.org/warranty.

MEMBERS FEATURED IN MN 2020 VIDEO

Minnesota 2020 is a progressive, non-partisan think tank focused on researching and reporting on public policy such as transportation, economic development, education and health care. The NCSRCC has partnered with them to spread a positive message about people working in the trades. Check out these videos of our members.

http://mn2020.org/issues-that-matter/views/activated-voices-learning-my-trade

NCSRCC OFFERS SAME SEX SPOUSAL PARTNER BENEFITS

In health and pension plans offered by both Wilson-McShane and North Central States Regional Council of Carpenters’ Benefit Funds, married couples are allowed same sex spousal partner benefits as long as that couple is married in a state where same sex marriage is legally recognized.

Under Wilson-McShane, the Health & Welfare Fund and the Twin City Carpenters Pension Fund (defined benefit) was effective Oct. 4, 2011, and the Carpenters and Joiners Defined Contribution Plan was effective Aug. 21, 2013.

Under North Central States Regional Council of Carpenters’ Benefit Funds, the Pension Fund and NCSRCC Supplemental Retirement Fund became effective September 16, 2013. For the NCSRCC Health Fund, the effective date was October 31, 2013.

In our Council, same sex couples can legally marry in Iowa and Minnesota. However, benefits apply regardless of the state in which you live. Please refer to your Summary Plan Description or call your fund office for the detailed Plan rules that apply to you.
ATTENTION:

MEMBERS OF LOCAL 68, 322, 464, 548, 930, 1382 AND 1847

If you work under the Central and Southern Minnesota Bargaining Agreement and have vacation funds paid into Wilson-McShane, the Carpenters Federal Credit Union (CFCU) issued your last vacation check May 1, 2013. Beginning June 1, 2013, that vacation fund turned into a savings plan, which means you can now access your money at any time. Rather than waiting to receive a check just twice a year, it is now more convenient for you to get your money when you need it.

In order to access your vacation money at any time, you must become a member of the credit union. To do this, visit the CFCU office or fill out forms online and mail them in.

Once you become a member, you have two options to access your money.

1. With a checking account, you can get a debit card and have access to your funds every time you reach into your wallet.

2. With a savings account, you can visit the credit union to withdraw cash, or you can call and have them mail you a check, free of charge.

To open a savings or checking account, you must carry a $5 minimum balance in a savings account at all times.

For more information, go online to www.carpentersfcu.org and click on “Union Savings Plan” on the left side of the screen.

The Carpenters Federal Credit Union is located at 720 Olive Street, Saint Paul, MN 55130. For more information, call 651-646-8827 or 1-888-815-8827. Office hours are Monday-Friday, 9 a.m.-5 p.m.

Please note if you do not open an account with the CFCU, there is a $30 monthly maintenance fee.

WILSON-MCSHANE OPENS OMAHA OFFICE

Wilson-McShane, plan administrator for health and pension benefits for members in Nebraska, has opened an office in the Omaha Local building located at 5051 F Street in Omaha. The office is intended to allow members better access to get their benefits questions answered.

Julie Baker or Carrin Brewer may be reached at any of the following numbers:
Phone: 402-913-2382
Toll-free: 855-413-0014
Fax: 402-913-2384
Hours are 8 a.m. to 4:30 p.m. Monday through Friday.

TWIC CARD MAY HELP SECURE WORK

A TWIC (Transportation Worker Identification Credential) card is an identification card offered by the Transportation Security Administration. This card is often necessary for employees requiring unescorted access to secure areas at ports, refineries, power facilities and other places where security clearance is required.

A TWIC card costs $132.50 and remains valid for five years. For more information, go online to www.tsa.gov/twic.

CONNECT WITH OPPORTUNITY AT JOB CONNECT

If you work in Minnesota and are looking for additional ways to connect with employers, the Job Connect website may be your answer. Go online to www.jobconnectmn.com, and on the right side of the page you will see a link to “Construction Hiring Connection.” From there you can access information about employment, careers in construction, community resources, education and other information connected with the construction industry.

TWIN CITIES COUNCIL OFFICE OFFERS WEEKLY ORIENTATIONS

In August, new member orientations in the Twin Cities metro changed from individual to group trainings. Now when members are accepted into the union, they receive a temporary work card. They are then expected to attend an hour-long orientation meeting within one week of their hire. These meetings are held each Wednesday at 4:30 p.m. at 710 Olive Street in Saint Paul, Minn.

This new format not only allows the Council to inform new members about the union, explain benefits and membership information and help with paperwork, but also results in less time off the job for new employees.
Journeyman Leadership Conferences inspire leaders with vision of UBC future

Last October, 123 rank-and-file NCSRCC members participated in a program at the UBC’s International Training Center in Las Vegas called “Building Leadership for a Strong Future.” The goal of the program was to give journey-level members a greater understanding of the Brotherhood, the construction industry and the important role they play in influencing the future of our union.

“I came home with the knowledge that I, too, can be a strong leader in my Local and show my area — and further — what the union brings to my family and our community,” said Libby Peterson, Local 322. “I have recommended this program to all of my fellow brothers and sisters!”

Those same members were brought together again March 22-23 at the Regional Council office in Saint Paul, Minn. They participated in a leadership refresher with Karl Andraschko, an instructor at the ITC, and discussed contract negotiations, political action, training and other important topics. They also attended information sessions on the Council’s energy committee, Area Standards program, finances and hospital protocol (ICRA) program. Finally, they had an opportunity to ask questions of Executive Secretary-Treasurer John Raines, as well as other members of the Council’s leadership team.

“In Vegas we learned a lot of tools on communication, that have been useful both on the job and off. We learned about what it means to be a leader in our industry, and how to mentor and encourage our members,” said Robert Buermann, Local 68. “We also learned that by using these tools we will increase our market share, and by doing so strengthen our brotherhood and protect our future.”

“In St. Paul we learned about new trainings available for our members,” he added. “We also got to talk one-on-one with our brothers who represent us from our regional council, and learned important information to bring back to our jobsite and share with our members.”

Leadership

Andraschko talked about the UBC’s goal of 70 percent market share, and how leaders need to share information with their Locals and on their jobsites. He talked about leadership as having personal power/influence, and said that effective leaders lead best by example. Leaders exhibit belief in the organization and the impact of that is a ripple effect of positive attitude, he said.

He spoke about generational leadership, and how today’s youth might learn and act differently on the jobsite than those from older generations. He said the UBC is on the crest of a large wave of people who are/will be retiring, and asked what members are doing to help bring new people into the trades.

Andraschko talked about transformational leadership through vision and values. He talked about change due to technology, mechanization and other factors. “Where will we be 20 years from now?” he asked. “Change is necessary to grow this union and to gain market share.”

He discussed change-oriented leadership, which includes developing the people around you, giving specific feedback and encouraging people to think. This helps people understand the greater sum of the parts, he explained. He talked about goal setting, letting people know what you are trying to accomplish, and being a leader who people want to follow. He talked about ownership and responsibility, and about reinvesting in our membership with training.

Contract Negotiations

General Counsel Burt Johnson and EST Raines talked to the group about contract negotiations, with Johnson explaining that collective bargaining sets the standards for the industry. He said that our Council has more than 60 collective bargaining agreements.

Johnson talked about the importance of being proactive vs. reactive when
bargaining, and said his goal is to increase understanding of contract negotiations among members. He noted that contracts establish all working conditions, as well as wages and benefits, and said market share is our number one piece of leverage in bargaining.

Politics
Political Director Kevin Hilton noted that the future of working men and women resides with our members, and said “all politics are local.” He discussed why political action is important and said that on a micro level they can help put members to work and garner market share, and on a macro level they help create a strong, vital labor movement that favors worker rights and protections.

Energy Committee
The Council has formed an energy committee with a goal of tapping into the energy market. This is essential to secure market share, work hours, bargaining power, safer work conditions, etc.

Area Standards
Director of Resource Management Phil Askvig talked about how “Shame On” banners identify end users because, even though they may hire a general contractor or construction manager or lease space from an owner, they ultimately have the ability to instruct those entities to hire area standards contractors for their build outs or remodeling projects.

Council Finances
Executive Director Mert Summers talked about capital expenditures, expenses the Council has been able to cut or reduce, working dues and some planned major expenses for the future.

Hospital Protocol
Director Joel Laskey discussed the Council’s plan to market best practices in infection control risk assessment (ICRA) for hospital construction.

Training
Co-Director of Education Al Atkinson previewed new cards the UBC will be sending to members that will include a QR code that smartphones can use to bring up a member’s full training record. He showed a presentation of the 14 training centers in our Council and showed members where to find information on our training centers and classes online at www.northcountrycarpenter.org/training-centers.php. He also explained how members can access their training records and certifications online by logging into the members-only section of the Council website, www.northcountrycarpenter.org.

Pro 10
Co-Director of Education Paul Trudeau talked about Pro 10, which is a course that teaches professionalism on the job. Topics include working with different personalities, diversity training, changing perceptions, communication, collaborative problem solving and taking responsibility for your own actions. He said contractors are beginning to request that our members have this training to get on their jobsites.

The last portion of the day was dedicated to a question and answer session with EST John Raines and other Council Leadership. The group talked about what the Council is doing to help our contractors succeed, and how we are measuring that success.

“I would have to say that this is a great program,” said Buermann. “I gained a lot from this training. The thing I would say I enjoyed best was getting to meet all of the leaders in our industry, and I look forward to working together to build a better future for all of our members!” A third installment of this leadership program will take place in November, when this group is combined with those who have participated in the Third-Year Apprentices program at the ITC in Las Vegas.
Millwright Leadership Conference elicits pride, productivity

The NCSRCC hosted its first-ever Midwestern District Millwright Leadership Conference July 23-24. The event, spearheaded by UBC Midwestern District Vice President Dave Tharp, included nearly 100 millwright business representatives, contractors, and other industry professionals.

The event kicked off with remarks by NCSRCC Executive Secretary-Treasurer John Raines at the L.J. Shosten Union Training Center in Saint Paul, Minn. Participants toured the training center and viewed live equipment demonstrations by apprentices. This was followed by dinner and a welcome by Tharp at the Regional Council office in Saint Paul.

“I think it was well structured and the members were professional with their demonstrations,” said Dale Coenen, Vice President of Construction for AZCO, Inc. “They should be very proud of what they have to offer.”

Participants were welcomed the following day by Doug Banes, General Vice President of the UBC. He said the number one priority for the future of our organization is manpower, and that we need to continue increasing training programs for members.

“Our contractors are the best friends we’ve got, because they hire our people,” Banes said. “We should do everything we can to help make them profitable.”

The Hon. Chet Culver, former Governor of Iowa, heads up the Chet Culver Group, a consulting firm whose focus is renewable energy. His group has been hired by the UBC as a liaison to the renewable energy industry. Culver said he is excited to “continue a partnership with [his] friends in labor,” and that he looks forward to helping build relationships in the energy sector.

Toby Madden, a Regional Economist with The Federal Reserve Bank of Minneapolis, talked about the economic recovery and how the growth did not bring new jobs with it in many areas. During the recession, he said, everyone learned to be more productive, and to work harder and smarter.

Bill Irwin, Executive Director of the Carpenters International Training Fund, spoke about the UBC training qualification cards that members received this fall, that helps them – and their contractors – keep better track of their training and qualifications. He said the UBC plans to offer online training at some point in the future, and that updated testing for the millwright qualification program will be available in January. Requirements are also changing for the rigging/signaling certification, he said, and those should be in place by December.

He talked about mechatronics (robotics), and said he believes that 20 years from now 70 percent of manufacturing jobs will be performed by robots. He said the UBC is currently writing curriculum to train members on mechatronics, and will eventually write plant-specific curriculum as well.

Irwin said the UBC is expanding its training capacity and state-of-the-art equipment at the International Training Center. The annual UBC training budget is $200 million, and features a 17-acre campus. The new addition, which was slated to open September 16, added 30 more classrooms, a dive tank for underwater welding and a retractable roof for scaffold training, among other things.

“We’re here to stay,” he said. “We’re here forever.”

Tom Flynn, UBC Political Director, talked about Davis-Bacon, and what attempts to repeal it could mean to our members and their ability to put food on the table for their families. He discussed our nation’s transportation infrastructure, the Affordable Care Act, pension reform and sustainability, and about the “jobless recovery” of the economy’s recent recession.
Kevin Wood, an account manager with Industrial Information Resources, talked about the resources his company has made available to Councils courtesy of the UBC. Specifically they provide information and contacts about industrial processing plants, including power, fuel, food, mining, paper and more.

Burt Johnson, NCSRCC General Counsel, talked about jurisdictional issues between trades and how partnering with our contractors is often the solution to solving these disputes. He said the UBC is rolling out a jurisdictional library that catalogs letters of assignment, which is good for both the UBC and its contractors.

Randy Eppard, Director of Education and Training at the ITC, talked about the UBC’s strategic priorities in achieving 70 percent market share. These include growth (retention, recruitment and organizing), skill and professionalism, and organizational effectiveness on all levels, from administrative to political to communication roles.

He discussed the Third Year Apprenticeship program, which began in June 2008. The program sends groups of third-year apprentices to the ITC in Las Vegas each year to learn more about the UBC and the construction industry, as well as the role they and other members play in the success of the organization. The UBC expects to have 10,000 members complete the program by 2015.

“We are looking to change the culture of our union in a positive way, both in the field and on the job,” Eppard said. “We teach members how professionalism, productivity, skill and attitude contribute to their success and the success of their contractors.”

He talked about the Journeyman Leadership program that was instituted by the UBC in December 2011. More than 5,000 members are expected to complete this program by 2015.

“With this program, we give members the tools to be more successful,” Eppard explained. “We want them to understand their influence on the future of our union, the importance of modeling best practices on the job, and that success equals effort.”

Pete Reuter, an International Representative with the UBC, spoke about the future of mechatronics. He said there is currently a lack of qualified technicians and that millwrights will be cross-trained to fill that skill gap. The UBC is in the process of developing a training program and expected to launch a 110-hour course in September.

He mentioned the L.J. Shosten Union Training Center has some automation equipment that was donated by the Ford Motor Co. Assembly Plant in Saint Paul earlier this year. “It will expose your members to automation and prepare them for formal mechatronics training,” he said. “Our trade must constantly evolve due to changes in technology.”

Mike Herman of Great River Energy closed out the day by discussing his company, a not-for-profit electric cooperative.

“As a millwright contractor, the training program the UBC is putting together is exactly what we need for maintenance, emergent and transactional business customers,” said Shawn Cotter, Vice President of Operations for S.T. Cotter Turbine Services, Inc. “The time at the conference was well spent, and I think a lot of owners would benefit from participating in something like this.”

>> St. Paul, MN

St. Paul Cogeneration is a biomass-fueled Combined Heat and Power (CHP) plant. CHP, also known as cogeneration, is the simultaneous production of heat and electricity for distribution. The CHP plant simultaneously produces heat and 25 megawatts of electricity, making it more than twice as efficient as a conventional electric power plant.

The Saint Paul plant is the largest wood-fired facility serving a district energy system in the nation, and produces hot water that heats about 80 percent of the commercial, residential and industrial buildings in downtown Saint Paul and adjacent areas, including the State Capitol Complex and all downtown city offices.

The CHP plant is fueled by clean urban wood residue. Wood residue is a form of biomass — a sustainable, renewable energy derived from plants and other organic matter. This system primarily uses wood from municipal and private tree and brush sites, storm events and commercial tree trimmings and removals.

Local 548 millwrights working for Egan Mechanical were on site providing shutdown maintenance.
We Build Businesses | FOTH HEADQUARTERS

De Pere, WI

Foth, a professional services consulting firm, broke ground on a $16 million, 95,000-square-foot expansion in September 2012. General contractor on the project is Miron Construction. Subcontractors include Appleton Lathing Corporation and H.J. Martin & Son. Work should be completed in the next few weeks.

Tony Hauser, Local 955

In April 2012, Fox Valley Technical College passed a $66.5 million public referendum for several major improvements to its campuses. Construction of the Student Success Center at its Appleton campus began in March 2013 and completion is expected by next fall.

The project includes a remodel of the current general education space on the second floor and adding new space on the first and second floors to include additional classrooms, academic advising, support skill development, tutoring, testing centers, disability services and library resources. Modernization and expansion of the current library space will also be incorporated into this project.
Construction was recently completed on a 70,000-square-foot, three-story Navitus Health Solutions office building and call center. Excavation on the 8-acre site began in Fall 2012. General contractor on the project was Ideal Builders. Subcontractors included OCI and H.J. Martin & Son.

We Build Energy | PRAIRIE ROSE WIND FARM

**Southern MN**

The Prairie Rose Wind Farm is a 200-megawatt wind farm located in Rock County, in the southwestern part of Minnesota. The farm includes 25,000 acres of land, 119 wind turbines, and represents a nearly $350 million investment.

The average wind speed in Rock County is about 18.5 miles per hour. At full capacity, the farm can power up to 90,000 homes.

A non-union ironworker outfit set the rebar, but so many problems arose that five bases had to be torn out, rebuilt and re-poured, causing major delays in the project. Due to these mistakes, union millwrights and ironworkers were forced to make up these delays in the erection phase of the project.

“This project was particularly interesting because we called in millwrights from across our Council to help fill the job,” said NCSRCC representative Brian Raines. “Our membership, through our training and productivity, really pulled together to get the project back on track.”

Members came from Nebraska, Iowa, and all parts of Minnesota to set bases and stack towers for Mortenson Construction. The work included a lot of overtime hours, including weekends and late nights. Eventually the project came in ahead of schedule.

“You should be very proud of your guys – they’re very good,” said iron worker and job superintendent Brett Roy. “They created a major turnaround within five weeks.”
Saint Paul, MN

Construction to transform the historic Schmidt Brewery into income based, multi-family housing began in December 2012. The bottle house is expected to be finished by the end of this year, with the brewhouse completed by June 2014.

There is a total of 247 artist rental lofts, with many of the units having exposed ceilings and brick or limestone walls. The studio, one-, two- and three-bedroom units range from 500-to 1,850-square-feet. Some features from the brewery have been incorporated into the architecture of the housing.

At least one resident of the home must qualify as an artist of some kind. The finished buildings will include dance, pottery, performance, mixed media, sound and paint studios, as well as communal gathering spaces such as a rooftop deck and clubroom, community party room and fitness center.

General contractor is Weis Builders. Subcontractors include Braxton Hancock & Sons, Minuti-Ogle Co., and J&B Windows.
St. Cloud, MN

Groundbreaking for the new ISELF building (Integrated Science and Engineering Laboratory Facility) at St. Cloud State University took place in October 2011. The $45 million, 100,000-square-foot teaching and research facility was completed just in time for the Fall 2013 semester.

General contractor on the project was McGough Construction. Subcontractors included Twin City Acoustics, Inc., Casework Installers, Minuti-Ogle Co., Inc., and Kellington Construction, Inc.

The Herb Brooks National Hockey Center at St. Cloud State University has recently undergone $30 million in improvements and expansion, including a new entrance on the south side of the building, new elevators and stairways, new restroom facilities and concession areas, and a new team store. Gathering areas and executive suites were added to the building, the locker room and training facilities were modernized, and a loading dock, staff offices and equipment storage areas were also added.

Subcontractors on the HBNHC included RTL Construction, Inc., and Donlar Construction.

We Build Minnesota

>> Duluth, MN

Minnesota Power is a utility company based in Duluth that provides energy services in the Upper Midwest, including to 16 municipalities and 144,000 residential and commercial customers. In 2012 it received an $800,000 Department of Energy stimulus grant to put in a new turbine at its Fond du Lac Hydro facility, which was built in 1924. When the pipe was drained and inspected, deterioration in the existing pipe was discovered and Minnesota Power realized it had even more work to do. It hired J.F. Brennan Company, Inc., to install 265 feet of new, 16.4-foot diameter pipe to convey water from the intake structure to the turbine. The project began in October 2012 and was completed in June 2013.

>> St. Cloud, MN

McGough Construction was the general contractor at CentraCare Clinic-Northway Family Medicine in St. Cloud, Minn.

Minnesota Legislative Conference

The 2013 Minnesota Legislative Conference was held March 13-14 in Saint Paul. The goal of the conference was to inform members about decisions made by the Legislature that affect their daily lives, including opportunities for construction jobs and preserving our standard of living.

March 13 included a reception attended by more than 50 legislators, and March 14 included information from UBC officials, legislators, and representatives from Mall of America and Mayo Clinic, among others. Following the conference, members traveled to the State Capitol where they visited with their area legislators and participated in a rally in the Capitol Rotunda.

Governor Mark Dayton addressed union members gathered in the Rotunda during the Day on the Hill rally at the Capitol.

House Minority Leader Kurt Daudt (R-Crown) takes time out of a meeting to talk with member Steve Nagel, Local 68, at the State Office Building.

Member Pat Gelhar, Local 322, talks with Rep. Denny McNamara (R-Hastings).

Scott Fuchs, Local 322, talks with Senate Minority Leader David Hann (R-Eden Prairie).

Sen. Kent Eken (DFL-Twin Valley) talks with LeRoy Babolian (left), Local 1176, and David Pederson (right), Local 1176.

Speaker of the House Paul Thiessen (DFL-Minneapolis) greeted the assembled crowd at the Capitol.

Linda Crowder, Local 322, and D Rojas, Local 322

Members greet Rep. Mike Nelson (DFL-Brooklyn Park), former Council business representative and a member of Local 322.

Bill Wacoviciak, Local 930, and Rep. Joe Radinovich (DFL-Crosby)

Senator Kent Eken (DFL-Twin Valley) talks with LeRoy Babolian (left), Local 1176, and David Pederson (right), Local 1176.
Wisconsin Legislative Conference

The 2013 Wisconsin Legislative Conference was held March 12-13 at Inn on the Park in Madison, Wis. The conference was held in conjunction with the Wisconsin State Council of Carpenters. The event included two days of speakers, an evening reception with state legislators, and meetings with individual member legislators at the State Capitol the following day. Discussions included worker misclassification and payroll fraud, opposing Right to Work legislation and preserving prevailing wage laws, the state budget and supporting apprenticeship funding.

“Building relationships with legislators is crucial,” said Political Director Mark Reihl. “It’s all about increasing jobs and work hours for our members.”

Speaker of the Assembly Robin Vos (R-Burlington)

Rep. Chris Danou (D-Trempealeau) talks with Brian Wrobel, Local 1143, at the evening reception.

Bryan Helm and Bob Schultz, Local 322

Bill Williams, CEO of Gogebic Taconite, said a 24-month construction phase on a taconite mine could mean as many as 2,000 jobs.

Sen. Jennifer Shilling (D-La Crosse) noted “it is important to be a citizen lobbyist.”

Dave Wolner and Claude Bovi, Local 322

Terry McGowan, President of Operating Engineers Local 139, has been a longtime partner with the Carpenters Union.

Assembly Minority Leader Peter Barca (D-Kenosha)

Reggie Newson, Department of Workforce Development Secretary

MN reinstates Political Contribution Refund program

Effective July 1, the Minnesota Legislature restored the state’s Political Contribution Refund program. This means you can make a donation to a candidate for the state legislature, Governor, Secretary of State, Attorney General or even to state political parties and you may be eligible for refunds of up to $50 for individuals and $100 for married couples.

“This innovative Minnesota program allows average citizens to participate in our election system and helps balance out the large donations that big special interests have in elections,” said MN Political Director Kyle Makarios. “I encourage members to take advantage of this program to support a state legislative candidate that you believe in.”

Please note that contributions for candidates for U.S. Congress, U.S. Senate or President are not eligible for this program.

Alvarado elected to HWC board

Juan Alvarado, NCSRCC representative and President of Interior Systems Local 1306 in Omaha, Neb., was elected to the Heartland Worker Center Board of Directors in June.

The mission of the Heartland Workers Center is “to improve the quality of life of Latino/a immigrant workers by promoting leadership development, workers’ rights and civil engagement through information sharing, training and organizing.” Its core values are equal rights, cultural respect, social justice and solidarity.

“It’s important to be involved in the community that dominates 50-60 percent of our industry in Omaha,” said Alvarado. “We help them organize themselves, we help them get paid and we help them stand up for their rights.”

Hispanic immigrants are a vulnerable community in Omaha, Alvarado explained, and are often taken advantage of by employers. Offering assistance through partnerships and coalitions is one way to help resolve common issues.

Of course, community involvement offers advantages to the Carpenters Union as well.
Pro 10 adds professionalism to your toolbox

Pro 10 is a professional training course developed by the Labor-Users-Contractors Committee (LUC) of the Minnesota Building Trades. The course goes beyond technical skills with a goal of developing cooperation and an understanding of each person’s role in an effort to maintain and grow market share.

The mission of Pro 10 is “to deliver the very highest quality, cost effective projects on schedule and within budget by employing and supporting motivated, focused teams. We are committed to adding value for clients through safety, innovation, professionalism, productivity and integrity.”

The training is based on four core principles: professionalism, safety, communication, and mutual respect. Four hours of training on these topics provide the framework for a supportive approach that includes tradespeople, contractors and end users, all of which contribute to creating and maintaining a more respectful, productive and safe worksite.

“I like that this course gets us, as carpenters, to start thinking about the big picture,” said Barb Pecks, Local 322. “It’s important that we are productive enough to earn the wages we get. We are better trained, safer and more professional than anyone else out there.

“Also, this class reminds us that our contractors and our end users are not our adversaries,” she added. “We need to work together with them to provide good customer service.”

An additional six hours of training is provided on the history of unions, worker readiness, construction project economics, customer relations, labor/management committee basics, working with different personalities, personal economics, diversity training, changing perceptions, contractor readiness, communication training, union leadership/steward training, service call standards, substance abuse awareness and collaborative problem solving.

“I thought it was a really good class,” said Ernie Ballard, Local 1463. “It gave you a different perspective on how to talk to people. I think if people with negative attitudes just kept a lot of that to themselves, things would go a lot smoother.”

In Wisconsin, a similar course to this called Carpentry What We Are is being replaced with Pro 10 curriculum.

Although Pro 10 training is not mandatory on all jobsites at this time, more and more companies are beginning to require it, said Co-Director of Education Paul Trudeau. All Business Representatives of the Regional Council are required to take Pro 10. So far classes have been offered in Hermantown, Rochester, Saint Paul and St. Cloud, MN; Des Moines, IA; and Fargo, ND.

For a schedule of courses offered at the training center nearest you, go online to www.northcountrycarpenter.org/training-centers.php.

Access your training records via smartphone

In September, the UBC’s Carpenters International Training Fund sent personal training verification cards to all members with any history of UBC training. The cards include the members name and UBC identification number, photo, and a black-and-white square known as a QR code.

The QR code can be scanned using a QR code reader, which can be downloaded for free from the app store on your smartphone. Once you launch the app, you will point your phone’s camera at the unique code, which will bring up the member’s photo, name, UBC I.D., Local and classification. It will also list all trainings and certifications completed by that member, including dates and pictures of cards and certificates.

Records update automatically as you complete additional classes. However, if you scan the QR code on your card and find your training information is incomplete, or if your card becomes lost or damaged, contact your area training center and they can update your information or replace your card.

The Jerry Alander Training Center in Hermantown, Minn., offered a 40-hour slab and girder bridge class in conjunction with Northland Constructors. From left, Mike Richter, Neil Porter, Dave Wolak, Kasey Frank, Kory Hansen, Evan Laurie, Cody Carroll, Cody Reene, Don Reene.
Camp Eden Wood

NCSRCC has volunteered with Camp Eden Wood — part of Camps of Courage and Friendship — in Eden Prairie, Minn., for many years. This year was no exception, with carpenters and floor covering apprentices renovating the camp’s Birchwood cabin.

Carpentry apprentices installed new doors and windows, while floor covering apprentices installed new flooring. The materials were funded in part by a $25,000 grant from C.H. Robinson of Eden Prairie, with the apprentices providing volunteer labor.

Jerry Bahmiller, maintenance director for the camp, said he is very appreciative of all of the work performed at his camp by the Carpenters Union.

“I don’t know that we would have been able to complete this project without the help of the carpenters and floor layers,” said Bahmiller. “Union people have been a big part of this camp for a long time. We can’t say enough nice things about what you do for us out here.”

Camps of Courage and Friendship serve people with developmental and/or physical disabilities and encourage them to have fun, make friends and learn new skills through memorable and enriching life experiences. Their facilities include five camps in Minnesota, including Camp Eden Wood; Camp Friendship near Annandale; Camp New Hope near McGregor; Camp Courage near Maple Lake; and Camp Courage North, near Itasca State Park.
United Way

United Way of Washington County East, based in Stillwater, Minn., hosts an annual fundraiser, and places “homefronts” in front of local businesses who contribute to their organization. This year the United Way needed 25 additional homefronts made, and turned to the Twin Cities Training Center for help. Carpenters Local 322 donated $500 for materials for the homefronts, and apprentices assembled the structures. From left, Ryan Orvis, Local 322; Katie LaPlant, Local 322; Ryan Conroy, Local 322; Louis Elmore, Local 322; Billy Nelson, Local 68; Kyle Davies, Local 322; Jeff Sutton, Local 322; Adam Fritche, Local 322; Travis Meierhofer, Local 68.

History Center

Local 1382 members donated time and material to build birdhouses for the History Center of Olmsted County. The birdhouses were sold to raise funds for programming at the History Center, and ultimately were given to Quarry Hill Nature Center, where they were used in their educational programs. “The efforts of your members helped two nonprofits,” said History Center Director Janet Timmerman. “It was a great partnership, and we were delighted they chose to help us out.”

Hammer with a Heart

Each year, members of Local 314 participate in Hammer with a Heart, which provides low income families in Dane County, Wis., with significant home repairs. Projects typically include roofing, siding, wheelchair ramps, doors, windows and bathrooms. For a wonderful video, go to http://www.youtube.com/watch?v=b8layGplqgM.

Miller-Dwan Foundation

Members of Carpenters Local 361 built a playhouse for the Miller-Dwan Foundation. MDF is an independent medical foundation in Duluth that supports the health of the regional community. The playhouse was auctioned off to raise funds for MDF. Pictured, from left, Andy Burns, Local 361, and Jim DeBreto, Local 606. Other Local 361 members who volunteered on the project include Tom Kesti, Kasey Frank, Aaron Van, Alex Myers and Jim Wallace.

Meeting
Tuesday | 1st Week | 6:00 p.m.

Carpenters Local 106 hosted a golf outing September 15 at Toad Valley Golf Course in Pleasant Hill, Ia. The event included 4-man best shot, miniature golf, food and drinks for members and their families.

Local 106 held its retiree banquet and pin dinner in May at Prairie Meadows Race Track and Casino in Altoona, Ia. Nearly 300 members and their guests gathered together in fellowship and to recognize members for their years of service.

Receiving their 30-year pins are, from left, Pete Janovick, Joe Davison, Frank Mitchell.

Receiving their 40-year pins are, from left, Gary Peterson, Robert Brooks, John Meyers.

Receiving their 45-year pins are, from left, James Peterson, Don Harvey, Don Minks, Casey Kazabeer, Ron Cain.

“In April, Ray Smalley of Local 106 was working on a new Hy-Vee store in Waukee, Iowa. As he was giving instructions to Dale Nelson, also a member of Local 106, everything went black... “and I woke up four days later in the hospital,” he said. It turns out that Ray had a heart attack.

“We were talking over the next step on the job, and all of a sudden he quit talking and fell backwards,” said Nelson. “It happened so quick, there were no signs at all, we were just chatting away.”

Nearby coworker Mark Pueschel did chest compressions while Nelson administered mouth-to-mouth resuscitation. Soon, another guy who works as a part-time paramedic arrived on the scene, so Nelson let him take over while Nelson went and called Ray’s wife, Linda.

“We knew we had to get him to breathe, and to relax and stay alive,” said Nelson.

Luckily, the job superintendent had done a practice medical emergency scenario on-site just a few weeks before, and Nelson feels that helped him — and others — remember to stay calm and do what needed to be done.

Thanks to the quick response of colleagues on the job, Ray is once again healthy and back to work, and very appreciative of friends who helped make that possible.

Meeting
Thursday | 2nd Week | 7:30 p.m.

Minnesota Governor Mark Dayton attended the Pheasants Forever Chapter 844 Carpenters for Conservation annual banquet held August 22 at the Saint Paul Regional Council.

The event also served as a form of community outreach, with information available about unions and our benefits and training. Best in show was a 1965 Ford Mustang GT.

Twin Cities area retirees sponsored concessions at the August 10 car show, with all funds raised going toward its member food shelf.

Members volunteered with Habitat for Humanity to build a new home for a single mom and her daughter in Pine City, Minn. They spent a week framing the structure from the ground up, roofed, shingled and built interior walls. The homeowner, who was required to put in 400 hours of sweat equity, “was very well deserving,” said volunteer Dennis Sargent. “She worked hard and wasn’t afraid to get her hands dirty. She jumped right in!”

From left, Bernie Schmitz, Gerald Boleen, Mike Krizanic, Bob Schultz, Charlie Marks, Kathie Marks, Pete Nelson.

All money raised at this year’s event was given to the Retiree Food Shelf for members. The car show committee for 2014 includes Greg Hartling, Local 1847, Kevin Rooney, Local 548, and John Swanson, Local 322.

Meeting
Tuesday | 3rd Week | 6:00 p.m.

In March, millwright Nathan Schroeder won the 30th annual John Beargrease Sled Dog Marathon in Duluth. It was his second time winning the 393-mile race, having also claimed first place in 2010. This year he also won awards for “Best Kept Team” and “Sportsmanship”.

His next stop? The Iditarod Trail Sled Dog Race. The Iditarod is an annual long-distance sled dog race run from Anchorage to Nome, Alaska — a total distance of 1,049 miles. It starts March 1, 2014.

“Running the Iditarod is a lifetime goal and I’m looking forward to this challenge,” said Schroeder. “The Alaskan mushing community has been welcoming and I greatly appreciate the hospitality from fellow mushers.”

Meeting
Tuesday | 2nd Week | 8:00 p.m.

Thanks to the UBC International program Helping Hands, Local 1463 was able to present member Kenneth Kocanda with a $10,000 check at a recent Local meeting. Kenneth was badly injured in a motorcycle accident in October 2012 and is no longer able to work.
Representative Keith Kessler and Local 1091 executive board member Kevin Boeshans participated in a “Brave the Shave” event to benefit the St. Baldrick’s Foundation, which supports children with cancer. The event took place March 15 as part of Basin Electric Power Cooperative’s annual event in Mercer County, North Dakota. As part of team “Shooting for a Cure,” the men shaved their heads to raise money to fund research and fellowships to help find a cure for kids’ cancer. They raised more than $1,600, which included $1,000 donated by the Council. “It felt great to do this for kids!” said Kessler.

In August, Local 548 sponsored a Poker Run during the 73rd annual Sturgis Rally in South Dakota. All funds raised support carpentry students in the Job Corps program.

“It’s a great opportunity to influence the lives of the younger generation,” said Joel Laskey, Local 587. “I hope some of these Job Corps guys will become members of our Local down the road.”

If you are interested in a t-shirt or bandana from the event, contact the Local at local587@ncsrcc.org or call 605-341-7091.

On June 5, Locals 731, 955, 1056 and 1146 sponsored its annual retiree bus trip to Milwaukee to see the Brewers play. Nearly 150 members and their guests tailgated and enjoyed the game.

Meeting
Wednesday | 1st Week | 6:30 p.m.

Local 310 held its annual family pin/award party February 23 at Memories Ballroom in Marathon, Wis. The evening included social hour, dinner, awards and door prizes. Winner of the $250 2013 scholarship was Blaine Krohn, son of member Mark Khron.

Damian Henry, left, received his five-year membership pin. At right is Representative Mark Kramer. Henry also received his Certificate of Apprenticeship.

Eric Pozorski, left, received his 20-year membership pin. At right is Representative Mark Kramer.

Dave Johnson and Ralph Erdman, right, received their 50 years of membership pins. Pictured at left is Representative Mark Kramer.

Doug Rachu, center, and Glenn Knoeck, right, received their 15-year pins. At left is Representative Gerald Yarie.

Meeting
Tuesday | 3rd Week | 7:00 p.m.
Meets at Junction City Village Hall, 1001 Main Street, Junction City

Note: Dates and times listed for events are subject to change.
Dan Frase of Hilti, left, demonstrates a hammer drill bit that vacuums while drilling to Shane Hoffman, Local 1056, of Miron Construction.

Wisconsin Department of Workforce Development Secretary Reggie Newson practices wire feed on a virtual welding machine while Jason Rolan of Lincoln Electric explains the settings.

Millwright instructor Rob Basten, right, demonstrates setting the impeller clearance on a pump to Millwright Local 1056 apprentices Kevin Mohr and Brian Heiden.

Millwright Local 1056 apprentice Jordon Fellenz shoots optical alignment with a precision level.

Millwright Local 1056 apprentice Aron Novak practices laser shaft alignment.

Millwright Local 1056 apprentices Sam Hilgart and Nick Hoffman tighten a flange with a hydraulic tensioning system.
Learning about the tools of the trade

The Council's Sisters in the Brotherhood chapter hosted a career fair June 12 at the Council's Saint Paul building. The goal was to educate women and other members of the community about training opportunities and possible careers with the Carpenters Union.

Representatives from McGough Construction, Custom Drywall, Olympic Construction, Adolph & Peterson Construction, Ames Construction and Summit Academy were on hand to talk with participants. Community members also toured the carpentry and floor covering training centers on site.

Robb Quinn, left, instructor at the Omaha Training Center, spoke with a former member of the military during a Hiring Our Heroes job fair in Lincoln, Neb., April 2. The Hiring Our Heroes initiative was a cooperative effort between the United States Chamber of Commerce, the Nebraska Department of Labor and the Nebraska National Guard. The goal is to help veterans and military spouses find meaningful employment in Nebraska.

“Our veterans have skills that translate easily over to the carpentry field, such as leadership, problem-solving, time management and an ability to work under pressure,” said Quinn. “It was an honor for me to answer questions and discuss opportunities with each of these American heroes.”

Nearly 100 students from five schools in the Twin Cities metro area visited the Twin Cities Training Center May 16. The students heard from Director of Education Paul Trudeau about opportunities in the construction industry, and toured both the carpentry training center and the INSTALL Floor Coverers Training Center. They got to visit with representatives from several area construction companies, as well as with apprentices and instructors.

Members of Local 106 in Des Moines, Iowa, participated in a Construction Career and Education Expo April 12 with the Des Moines Public Schools. The event was sponsored by the Central Iowa Apprenticeship Coordinating Committee and took place at the Iron Workers Training Center in Des Moines.

More than 500 students in grades 9-12 had the opportunity to participate in a variety of construction demonstrations, including lectures on safety regulations, and visited with representatives about careers in construction.
Kurt Guralski: On the Road to Recovery

Kurt Guralski, an apprentice with Millwrights Local 1056 in Wisconsin, traveled to International Falls, MN, for work on May 5. He attended an orientation, unloaded his tools and went to dinner. Later that night, he texted his wife, Jenna, and went to bed.

When he didn’t show up for work the next morning, his supervisor, Ron Yunk, also a member of Local 1056, went to check on him. He found Kurt unresponsive in his hotel room and called 911. Kurt was taken to the hospital in International Falls, and then helicoptered to a neuro trauma intensive care unit in Duluth. He had extremely high carbon monoxide levels, and a CT scan showed swelling and damaged brain tissue.

Later, the Guralskis learned that several people became ill in the same hotel room within the month prior to Kurt staying there. It was discovered there was an issue with the boiler and venting system for the pool area.

It wasn’t until May 16 that Kurt woke up from his coma, and on May 18 was upgraded to intermediate ICU. On May 28 he transferred to Aspirus rehabilitation center in Wausau, Wis., and was scheduled for speech, occupational and physical therapies. On June 15 he received a day pass to come home for Father’s Day, which he spent with sons Kolton, Kooper and Jevin. He was discharged for good June 18, which was the Guralskis’ nine-year wedding anniversary. He continues various outpatient therapies.

“Kurt is beating all of the odds,” said his wife, Jenna. “He wasn’t expected to survive, or have any quality of life if he did. Instead, he is home, enjoying life and spending time as a family, and helping our 8-year-old son, Kolton, start his racing career.”

On Saturday, June 29, a benefit was held for Kurt at Memories Ballroom in Wausau. Sponsors included friends as well as Miron Construction. If you would like to make a donation to the family, there is a “Kurt Guralski Benefit” account set up at any Associated Bank in Wisconsin, Minnesota and Illinois.

“Our family would like to thank Ron Yunk for knowing Kurt well enough to realize something was wrong, and go back to the hotel to check on him, and for all of his continued support,” said Jenna.

“We would also like to thank our whole Miron Construction family for all of their support and donations, and especially everyone who donated items and worked so hard to make the benefit a success.

“We would like to thank our local race track, State Park Speedway, and especially the amazing track announcers, Curt and Bart, and fellow race car drivers and fans for their support and donations,” she continued. “A special thanks to my mom for taking off of work to take care of our boys for three weeks so I could stay by Kurt’s side in Duluth, and also to my Dad for letting her.”

“Thank you to everyone who has donated and supported us in any way during this difficult time, and for your continued prayers for Kurt’s full recovery.”
2013 NCSRCC Scholarship Winners

Each year, the Regional Council awards dozens of scholarships to children of members to help them further their education. Applicants must have a parent or guardian who is a member in good standing, and must be enrolled in an accredited post-secondary program. Scholarships are a one-time, $500 grant.

Applicants must have a parent or guardian who is a member of the NCSRCC. Scholarship applications can be found online at www.northcountrycarpenter.org/scholarships.php. Deadline for the 2014 scholarships is January 31, 2014. Completed applications must be returned to NCSRCC, 700 Olive Street, Saint Paul, MN 55130, or sent via email to kbechtel@ncsrcc.org.

Do you know a union member not listed who is deployed on active duty in the military? The Twin Cities Retiree Committee sends monthly care packages to Regional Council soldiers via a program called Union Care. To have a package sent to your soldier, send their name, Local, military address, rank and APO to Bernie Schmidt at bigbern@q.com.

Issue #13: Fall 2013  
North Country Carpenter magazine is published two or three times a year by North Central States Regional Council of Carpenters, 700 Olive Street, Saint Paul, MN 55130.

POSTMASTER: Send address changes to North Country Carpenter, 700 Olive Street, Saint Paul, MN 55130.
Sixth grade students from Spirit of the Lake Community School visited the Jerry Alander Training Center in Hermantown, Minn., this past spring. In addition to hearing about what it is that carpenters do, they toured the training center and even got the opportunity for some hands-on experience. With the help of several members from Local 361, the students made their own desks to take back to school with them. These desks will travel with them from class to class until they graduate.

Getting hands-on experience with real tools was an exciting part of the day for all students. The importance of safety was shared with all students, including the necessity of a hard hat and safety glasses.
