

Become a carpenter!

DIEGO

"I became a carpenter because I like working with my hands. I couldn't see myself sitting at a desk all day. I wanted to be out in the world, making things happen."

EMILY

"My brother went to college, and when he got out he couldn't find a job in his major. I'd rather spend my time making money than collecting debt."

JOSH

"Some of my friends are working fast food jobs and making \$10 an hour. I've got cash in the bank and my eye on a sweet motorcycle!"

ANTHONY

"I'm making good wages, have health insurance and I'm even putting money toward retirement. I'm investing in my future."

BEN

"I was able to put my apprenticeship training toward getting a 2-year college degree. I'm setting the stage to be the boss and run my own projects."

Are you looking for more than *just a job*? Consider a career in construction!
